DETAILED ACTION

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1 and 4: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a geosynthetic fabric and process for locating and measuring soil or infill associated with a civil engineering structure comprising yarns and a plurality of optical fibers in parallel, the fibers containing Bragg gratings evenly spaced in series of N1 consecutive gratings that correspond to the same wavelength, the series distributed in identical sets of N2 consecutive series that correspond to different wavelengths, in at least two fibers the numbers N1 and N2 are determined in such a way that the measurement of differences between the wavelengths of the incident light transmitted in each on the fibers and the wavelengths of the light reflected by the Bragg gratings enable to locate the deformations to which the structure is subjected to measure the elongation of the fibers where the deformation occurs, in combination with the rest of the claimed limitations.

With regard to claims 2, 3 and 5-9: These claims are allowable over the prior art of record because they depend from allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
